

Audition Script for the Fire and Life Safety App

[Calm, guiding tone]

Okay—this is it. You're in your room, and the smoke alarm goes off. What do you do?

[Quick urgency]

Don't panic—roll out of bed, stay low, and crawl. The air's better down there.

[Fear, then realization]

Wait—don't just open the door. Feel it first. Ow! It's hot! That means the fire's close. You need another way out.

[Brave, encouraging]

Don't hide—get where someone can see you. Use a flashlight, wave a shirt, yell if you need to.

[Relieved, proud]

You made it out. That's how it's done. Be smart, stay calm, and always have a plan.
